World Class Tests Explanatory Notes

World Class Tests

World Class Tests are designed for the top 10% of upper primary and lower secondary students in mathematics and problem solving. The tests comprise paper- and computer-based questions. They require students to apply thinking and logic by demonstrating their ability to process and respond to unfamiliar information and communicate their thought processes coherently.

Grades

The results of the World Class Tests are reported in terms of Pass, Merit and Distinction. The grade represents the result for this student solely on this test.

Conditions of issue
